SUBJECT INDEX

General

Photoacoustic and related photothermal techniques, H. Vargas and L.C.M. Miranda 161 (1988) 43
Quasiclassical symmetry properties II, E. Papp 161 (1988) 171
Quantum mechanics of classically non-integrable systems, B. Eckhardt 163 (1988) 205
Unified regularization of Bianchi cosmology, K. Rosquist and R.T. Jantzen 166 (1988) 89
Quantum nonlinear Schrödinger equation: Two solutions, E. Gutkin 167 (1988) 1
Ultra-high pressure apparatus, F.P. Bundy 167 (1988) 133
Quantum Brownian motion: the functional integral approach, H. Grabert, P. Schramm, G.-L. Ingold 168 (1988) 115
Fokker–Planck equation for interacting waves. Dispersion law renormalization and wave turbulence, S.J. Putterman and P.H. Roberts 168 (1988) 209
Spatial spin resonance of polarized neutrons. A tunable slow neutron filter, M.M. Agamalyan, G.M. Drabkin and V.I. Sbitnev 168 (1988) 265
Quantum tunneling: a general study in multi-dimensional potential barriers with and without dissipative coupling, M. Razavy and A. Pimpale 168 (1988) 305
Light-induced drift of Na atoms, H.G.C. Werij and J.P. Woerdman 169 (1988) 145
Causal interpretation of a system of two spin-1/2 particles, P.R. Holland 169 (1988) 293
Quantum electromagnetics of an electron near mirrors, G. Barton and N.S.J. Fawcett 170 (1988) 1

The physics of elementary particles and fields

Low-energy hadron physics from effective chiral Lagrangians with vector mesons, U.-G. Meissner 161 (1988) 213
The quark structure of the nucleon from the CERN muon experiments, T. Sloan, G. Smadja and R. Voss 162 (1988) 45
Non-perturbative aspects in supersymmetric gauge theories, D. Amati, K. Konishi, Y. Meurice, G.C. Rossi and G. Veneziano 162 (1988) 169
Nonlinear realization and hidden local symmetries, M. Bando, T. Kugo and K. Yamawaki 164 (1988) 217
Triviality pursuit: can elementary scalar particles exist?, D.J.E. Callaway 167 (1988) 241
The toponium scenario, J.H. Kühn and P.M. Zerwas 167 (1988) 321
Conformal techniques in string theory and string field theory, S.B. Giddings 170 (1988) 167

Nuclear physics

Meson exchange models of the nuclear response function, S. Krewald, K. Nakayama and J. Speth 161 (1988) 103
Low-energy hadron physics from effective chiral Lagrangians with vector mesons, U.-G. Meissner 161 (1988) 213
The quark structure of the nucleon from the CERN muon experiments, T. Sloan, G. Smadja and R. Voss 162 (1988) 45
Electromagnetic processes in relativistic heavy ion collisions, C.A. Bertulani and G. Baur 163 (1988) 299

Damping of high-lying single-particle modes in heavy nuclei, S. Galès, Ch. Stoyanov and A.I. Vdovin 166 (1988) 125
The broken pair model for nuclei and its recent applications, K. Allaart, E. Boeker, G. Bonsignori, M. Savoia and Y.K. Gambhir 169 (1988) 209

Atomic and molecular physics

Bound-state excitation in ion–ion collisions, R.S. Walling and J.C. Weisheit 162 (1988) 1
"Atomic" bremsstrahlung, M. Ya. Amusia 162 (1988) 249
Modern trends in the spectroscopy of multicharged ions, L.N. Ivanov, E.P. Ivanova and E.V. Aglitsky 164 (1988) 315
Collisional alignment and orientation of atomic outer shells. I. Direct excitation by electron and atom impact, N. Andersen, J. Gallagher and I.V. Hertel 165 (1988) 1
Asymptotic exchange interactions in ion–atom systems, M.I. Chibisov and R.K. Janev 166 (1988) 1
Dielectronic recombination and related resonance processes, Y. Hahn and K.J. LaGattuta 166 (1988) 195
Stepwise electron and laser excitation of atoms, W.R. MacGillivray and M.C. Standage 168 (1988) 1
The theory of low-energy positron collisions with molecules, E.A.G. Armour 169 (1988) 1
Light-induced drift of Na atoms, H.G.C. Werij and J.P. Woerdman 169 (1988) 145

Classical areas of phenomenology (including applications)

Photoacoustic and related photothermal techniques, H. Vargas and L.C.M. Miranda 161 (1988) 43
Stimulated emission and relaxation processes in molecular crystals, V.V. Eremenko and L.A. Ogurtsova 166 (1988) 353
Quantum electromagnetics of an electron near mirrors, G. Barton and N.S.J. Fawcett 170 (1988) 1

Fluids, plasmas and electric discharges

Ion-acoustic turbulence and anomalous transport, V.Yu. Bychenkov, V.P. Silin and S.A. Uryupin 164 (1988) 119
Relativistic electron beams and beam–plasma interaction, P.C. de Jagher, F.W. Sluijter and H.J. Hopman 167 (1988) 177
Magnetohydrodynamics in solar coronal and laboratory plasmas: A comparative study, P.K. Browning 169 (1988) 329

Condensed matter: structure, thermal and mechanical properties

Amorphisation in solid metallic systems, K. Samwer 161 (1988) 1
A unifying approach to lattice dynamical and electronic properties of solids, C. Falter 164 (1988) 1
A theory of sound propagation in disordered one-dimensional metals, E.A. Kaner and Y.V. Tarasov 165 (1988) 189
Glassy disordered systems: topology, atomic dynamics and localized electron states, M.I. Klinger 165 (1988) 275
Aperiodic crystals: a contradictio in terminis?, T. Janssen 168 (1988) 55
The ANNNI model – theoretical analysis and experimental application, W. Selke 170 (1988) 213

Condensed matter: electronic structure, electrical, magnetic and optical properties

Amorphisation in solid metallic systems, K. Samwer 161 (1988) 1
A unifying approach to lattice dynamical and electronic properties of solids, C. Falter 164 (1988) 1
Electron localization in quasi-one-dimensional organic conductors, A.A. Gogolin 166 (1988) 269
Stimulated emission and relaxation processes in molecular crystals, V.V. Eremenko and L.A. Ogurtsova 166 (1988) 353
The electron transport properties of metallic glasses, M.A. Howson and B.L. Gallagher 170 (1988) 265

Cross-disciplinary physics and related areas of science and technology

Distributed optical-fibre sensors for the measurement of pressure, strain and temperature, A.J. Rogers 169 (1988) 99

Geophysics, astronomy and astrophysics

Magnetic field generation in celestial bodies, A.Z. Dolginov 162 (1988) 337
Theory of supernovae, G.E. Brown (editor), including: 163 (1988) 1
Foreword, G.E. Brown 163 (1988) 3
Presupernova evolution of massive stars, K. Nomoto and M. Hashimoto 163 (1988) 13
Collapse calculations in stars of mass less than $15M_{\odot}$, E. Baron 163 (1988) 37
General relativistic core collapse with a soft nuclear equation of state, S.A. Bludman 163 (1988) 47
Convection, type II supernovae, and the early evolution of neutron stars, A. Burrows and J.M. Lattimer 163 (1988) 51
Convection in core collapse supernovae, J.R. Wilson and R.W. Mayle 163 (1988) 63
Presupernova models: sensitivity to convective algorithm and Coulomb corrections, S.E. Woosley and T.A. Weaver 163 (1988) 79
Neutrinos in supernovae, J. Cooperstein 163 (1988) 95
Neutrino transport in stellar collapse, E.S. Myra 163 (1988) 127
Observation of SN1987A by neutrino light, F. Reines and J. VanderVelde 163 (1988) 137
Neutrino diffusion, primordial nucleosynthesis and the r -process, J.H. Applegate 163 (1988) 141
Gamma-ray bursts and glitching neutron stars, R.I. Epstein 163 (1988) 155
The equation of state of dense matter, G.E. Brown 163 (1988) 167
Magnetohydrodynamics in solar coronal and laboratory plasmas: A comparative study, P.K. Browning 169 (1988) 329
Interferometric imaging in optical astronomy, F. Roddier 170 (1988) 97
Cygnus X-3, a critical review, J.-M. Bonnet-Bidaud and G. Chardin 170 (1988) 325
